

Special Needs Future
Development Center

Growing up confident!

The Center

The Special Needs Future Development Center was established in 2007 in Dubai as the only training center for young adults with special needs that has no upper age limit for enrolment (Minimum age requirement of 14 years). The center provides for a dedicated place for students to facilitate their lifelong learning and development.

SNF offers a range of training and development programs to prepare young adults with special needs for integration into mainstream society and future inclusion in the workforce.

SNF Methodology

Provides a holistic learning platform to students through different departments that facilitate active engagement to unlock their potential and achieve as much independence as their abilities allow.

The Individualized Education Program (IEP) is a written plan developed by the Center's educators and specifies the students' academic goals along with the method to obtain these goals.

Award Scheme Development & Accreditation Network (ASDAN) is a pioneering curriculum development organization and awarding body offering programs and qualifications that explicitly grow skills for learning, skills for employment and skills for life.

The IEP is enhanced with ASDAN Goals that help our students get certified for their achievements.

Our Mission

Committed to enhancing the quality of life of people of determination through training to enable them to achieve their fullest potential by:

- 1 Developing the current and potential skills of each student in areas that are important for independent functioning at home and in the community
- 2 Committing to the professional development and personal fulfilment of our staff
- 3 Engendering greater public awareness, understanding and acceptance of people of determination
- 4 Provide counselling services to improve personal, social growth and development

***At SNF, we don't just take care of our students,
we help them learn to take care of themselves!***

Functional Department

Focuses on honing the student's gross and fine motor skills, eye-hand coordination, and muscle development.

Art and Craft Department

Concentrates on the student's perceptual, cognitive, emotional, intellectual and aesthetic growth besides improving their fine motor skills, group work and vocational skills.

Advanced Functional Department

Prepare students with vocational skills to be used in the workplace and students are also trained in using equipment such as photocopy and laminating machines.

Daily Living Skills Department

Equip students with the basic skills required to function independently in one's home environment and make them self-reliant.

Physiotherapy Department

Strives to develop the student's physical strength in terms of muscle tone, range of motion and overall coordination of body movements through a regime of exercise and activities.

Communication & Social Skills Department

Aim to build bridges that ensure a smooth transition of our students from a school-led environment to the adult world of work culture and societal responsibilities.

Computer Department

Focuses on equipping students with basic computer skills including Microsoft Office and data entry to help them develop their language, comprehension and discrimination skills.

Speech Therapy Department

Dedicated to providing high-quality speech, communication, and language training within a fun learning environment.

***“Because with a little hope
and a lot of love,
nothing is impossible!”***
